Lovely Homes

• The charm and fascination of a home depends much upon trees and shrubs and flowers. There are many homes of which passing strangers inquire, "Who lives in that lovely home?" There is unending satisfaction and delight—and a great pride—in the possession of a home made lovely by its trees and flowers.

Beautiful Gardens

• Perhaps nothing about a home can give more pleasure than a well-planned garden where we may sit alone or in company with our friends. It need not be formal or expensive, but may be planned with the simple beauty of spreading trees, a well-clipped lawn of grass with surrounding hedge and here and there the enticing beauty and color of nodding flowers.

Profitable Orchards

OVER 1,000 POUNDS PER ACRE

This beautiful young papershell pecan orchard belongs to the United States Government, and was planted for the purpose of studying the management and possibilities of commercial pecan growing.

Papershell pecans at the rate of well over 1,000 pounds per acre have been harvested from several varieties before the orchard was seventeen years of age.

Above photo taken when the papershell pecan orchard was about 14 years old.

**Grayway Grown
EVERBEARING
STRAWBERRIES**

Enjoy this delicious fruit
fresh from your own garden!
Grayway-grown Everbearing
Strawberry plants come direct from
our own field at Arlington,
Texas.

GEM Everbearing

A widely-grown and immensely popular variety. Has large, red fruits of top quality that has satisfied many folks for years. It is somewhat easier to grow than Streamliner, and a splendid all-around strawberry that produces over a long period. We have selected Gem as one of the finest varieties for this section and it will not disappoint you.

100 PLANTS POSTPAID \$3.50

STREAMLINER Everbearing

A newer variety that is making friends because of the long period of production of extra large, delicious fruits. Fruits all summer and into the fall under good care. We know of a patch of STREAMLINER strawberries grown near Arlington, planted in February that started bearing in March and bore all summer and through Christmas a couple of years ago. A sensational berry.

100 PLANTS POSTPAID \$4.50

How to Grow Strawberries

Culture: Set plants 10 to 12 inches apart, either in rows 2 1/2 to 3 ft. apart, or in beds 2 to 3 ft. wide. Plant on raised beds for drainage. Strawberries like a mellow, fertile soil and ample though not excessive moisture throughout the bearing season. Clay soils may be loosened by spading in sand, peat moss, etc. Since a large strawberry patch is not necessary to supply an ordinary family, it is not too expensive to prepare the soil on a small area. While we grow our strawberries right out in the open, we advise home growers to try to give them some shade, especially from the west sun.

BLACKBERRIES - DEWBERRIES - BOYSENBERRY

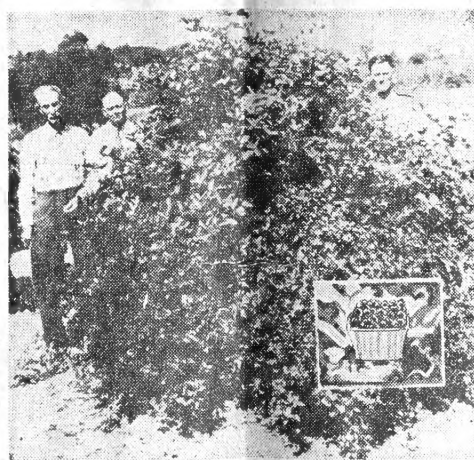

Gray's EARLY WONDER (Same as Dew-Black)—In our estimation, this is the best of the blackberries. Very hardy, very prolific producer of large fruits. Does not require staking. Drought resistant, and we don't ever recall seeing it fail to produce a crop. Truly an outstanding blackberry that you can depend upon to produce berries for your own use or for market. Produces 1,000 to 2,000 gallons per acre of large, attractive berries. Ripens June.

PRICES: 10 for \$1.00; 50 for \$4; 100, \$6; 1,000, \$40.
AUSTIN DEWBERRY—A vigorous, prolific dewberry that has been a very profitable and reliable variety for a long time. Ripens in May-June.
PRICES: 10 for \$1.50; 25, \$3.00.

Gray's GIANT THORNLESS BOYSENBERRY—Think of raising berries two inches long! We could hardly believe our eyes when we first saw them. Hardy, vigorous canes 15 to 20 feet long, covered with enormous berries growing on a trellis, up and out of the dirt. Few seeds. Distinctive flavor reminding of combination, loganberry, blackberry and raspberry. Delicious for table, market, canning, freezing, juice, etc. You'll enjoy picking these enormous berries without bothering about thorns. Plant 8 ft. apart in 6 or 8 ft. rows.

PRICE: 10 for \$1.50, 25, \$3.50; 100, \$13

Everbearing Tree Blackberry

**Six Gallons of
Blackberries From
One Plant**

This unusual blackberry blooms here after May 10th and escapes frosts. Berries start to ripening about June 20th and continue through July and August. The originator gave us the following information:

"The first year's growth is inclined to droop to the ground; second and third year they put out two to six tree-like canes that attain a height of four to six feet."

"The fruits are round, good size, sweet, yet enough acid for jams and jellies. Excellent keeper, has rubber-like skin but not tough, making it a wonderful shipper. Plants are very thorny, but berries grow on a long fruit stem in clusters of seven to thirty berries. Ninety percent of the fruit on our vines grows on limbs extending above the thorns."

"The fruit is borne up off the ground and ninety-five per cent is free from dirt, regardless of weather. From a two-year old plant we have gathered three gallons, or 24 pounds. Three-year plants have broken all records with a yield of 6 gallons, or 48 pounds of fruit from one plant, or at the rate of more than 7 1/4 tons per acre, planted 12 x 12 feet, without any fertilizer."

"We now have some 325 five-year-old plants from which we sold their entire crop this year at \$1.00 to \$1.35 per gallon, there being no other berries on the market when they ripen. Fine commercial possibilities."

"They have shown no sign of disease. People in towns and cities may grow all the berries they can use from six plants in the yard or small garden."

Ready-to-bear 2-year plants that should bear some the first summer.

"Go Grayway All The Way"

NOW! Grow PEACHES LIKE THESE!

Will grow on almost any soil. Every home can have delicious peaches—fresh and sweet right from your own trees. While it is in season, there is no fruit eaten and enjoyed by so many people as the peach.

Order
Now

(Listed in approximate order of ripening.)
GOLDEN JUBILEE—A sure producer of delicious yellow flesh freestone peaches of good size and good quality. One of the most dependable producers. A little too soft for shipping except to local market.
HALEHAVEN—Large, beautifully colored, prolific, hardy. One of our very best early freestone yellow-fleshed shipping or home peaches. A most profitable commercial variety. Good shipping or canning. Ripens about a week after Golden Jubilee and 2 weeks before Elberta.
EARLY ELBERTA—Delicious yellow fleshed freestone that is an excellent producer.
SULLIVAN'S EARLY ELBERTA—A newer variety ripening about a week ahead of the regular Elberta and almost identical with it otherwise. This peach seems to be one of our best varieties, try it.
ELBERTA—The old reliable, well known yellow fleshed freestone familiar to everybody. Still the most widely planted peach in the world.
FRANK—A yellow fleshed clingstone of fine flavor that ripens about two weeks after Elberta. Small seed, delicious. Where moisture is available for this late ripening peach, you'll like it.

HOLLAND (Also called Kincaid)—Huge size, attractive, early production.
KING DAVID—Medium size, red. Enormous producer.
DOUBLE RED DELICIOUS—Grown from coast to coast.
YELLOW DELICIOUS—Well-known outstanding Apple.
\$ 10 3 ft., branched \$1.25 and \$2.45
TANG NASHI—Large fruit, shape like an acorn without the cap. Seedless. Fine quality for market or home.
PRICE: 4 to 5 ft. \$2.50 each
(Fruit Prices are Not Prepaid)

1000 TEXAS EVERBEARING FIG BUSHES

WILL BEAR DELICIOUS FIGS THIS SUMMER

Grayway Grown

While They Last
18 to 24 in.
PLANTS
3 Only \$2.75
PREPAID TO YOUR MAIL BOX

FIGS THIS SUMMER!

Gather your own figs this coming summer from Grayway's TEXAS EVERBEARING jumbo fig bushes. We think this is one of the finest of all fig varieties.
Bears heavily on little trees just a few inches high in the nursery rows. Figs from June until frost. Seems to do better farther north than most figs. Good size, straw colored fruit that rarely cracks. Excellent, sweet flavor.

We have known over \$400 per acre to be sold from an orchard of Texas Everbearing figs.
Every GRAYWAY Texas Everbearing Fig bush in our nursery bore figs this past summer, and you can transplant one to your own yard. In northern sections, this fig will bear each summer if the roots can be protected from freezing, or the plant might be dug up and carried through the winter in moist packing material protected from freezing, and replanted the following spring. Try it!

O.S. GRAY NURSERY

ARLINGTON, TEXAS

1/2-MILE WEST OF ARLINGTON
ON FORT WORTH-DALLAS HIGHWAY 80

You CAN SAVE ON PAPERSHELL PECAN TREES

O. S. GRAY NURSERY

Arlington, Texas

Dear Folks:

Would you be surprised to know that there are over 50,000 pecan trees growing in my nursery here at Arlington—as well as thousands and thousands of other shrubs, vines, shade trees, evergreens, ornamentals, fruit trees, berry vines, etc.?

I've been in the nursery business for over twenty years, and have thousands of customers in many different states. If you can't visit my nursery in person, you can JUST MAIL ME YOUR ORDER, for many of the things that we grow can be shipped direct from our nursery to you by parcel post, express, or motor freight.

When you ORDER BY MAIL, you sit right in your own home and write out your order. I believe in a square deal in business just like in other things, and if the plants don't please you when they arrive, return them immediately in good condition and get your money back. Visitors are always welcome at our nursery. Our nursery is located between Dallas and Fort Worth on Highway 80, just one-half mile west of the city limits of Arlington. It's easy to get to in your car, and plenty of free parking space.

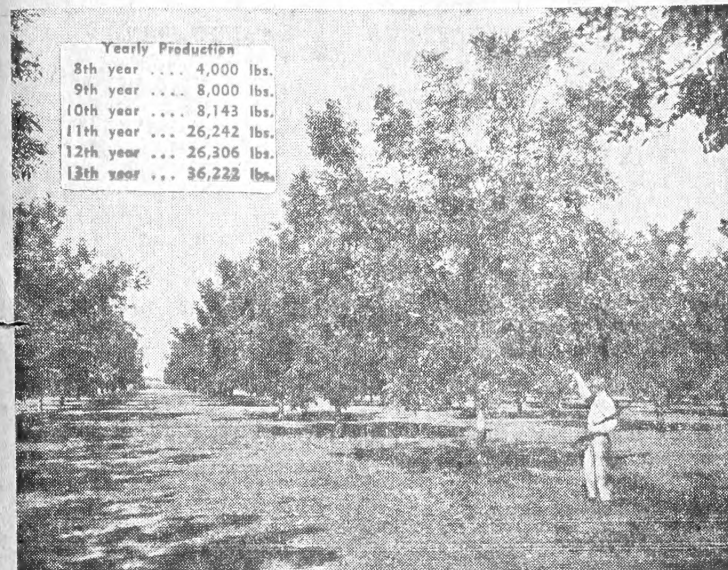

One of the things that I appreciate more than anything else is the large number of people who come to our nursery because we have been recommended to them by one of our customers and friends. You'll find us mighty friendly folks when you visit us. You'll find that "The Grayway is the Best Way," and we are sure you will want to "Go the Grayway All the Way."

Yours cordially,

O. S. Gray

OWNER

Grayway-Grown Plants Are Good Plants

Mr. G. W. Bechtel of Tarrant County, Texas, inspects his 36,000 pound crop in his young 50-acre GRAYWAY-GROWN Papershell Pecan Orchard, only 13 years old. He sold \$10,000 worth of papershell pecans the 11th year. This fine orchard was planned by O. S. Gray and planted with GRAYWAY-GROWN nursery trees.

BEARING SIZE Grayway GROWN PAPERSHELL PECAN TREES MOVED DIRECT FROM OUR NURSERY TO YOUR HOME

What we call our bearing size papershell trees are those that have borne one or more crops of nuts in our nursery; mostly trees with trunks 1 1/2 inches and up in diameter. Those with trunks 3 in. and up should usually be moved with a ball of earth around the roots—called "B & B" for "balled & burlapped." Weighing from 500 to 1,500 lbs., they require special winches and trucks for handling, and sell for \$75.00 and up, planted and guaranteed. Because of the earth around the roots, they are pruned very little; so they go right on producing with little delay, giving quick production and quick shade, saving several years in time. Ask for prices and sizes for your use.

IT'S EASY TO GROW YOUR OWN PAPERSHELL PECANS

There is a home here in Arlington where the owners have gathered over 1,000 pounds of delicious papershell pecans from trees planted around the house and yard. These trees often give plenty of delicious nuts not only for home use and for gifts to friends, but provide more than sufficient funds to pay all taxes.

There are many thousands of homes where a few GRAYWAY-GROWN papershell pecan trees would provide all pecans needed in the home and a surplus for sale or gifts. The pecan is also one of the most beautiful and long-lived of all trees—makes a wonderful shade tree.

Plant a few GRAYWAY-GROWN papershell pecan trees and grow plenty of delicious papershell trees right at your own home.

How To Plan A Modern Grayway Papershell Pecan Orchard

We have prepared a leaflet with diagram and explanation of details of our Grayway Modern Orchard Plan. Send 10c in stamps or coin to defray printing and mailing costs.

"The Gray Way Is The Best Way"

SHADE TREES THAT PAY DIVIDENDS

The Papershell Pecan is one of the most beautiful and longest lived of all trees, and it bears one of our finest nuts.

In the value of its delicious nut crop, it will repay its cost not once, but over and over again, regardless of whether it's original cost was \$1 or \$100.

SAVE! by using "B" GRADE TREES

"B" GRADE TREES are just as good fundamentally as the Standard "A" Grade, except they have trunks or tops not straight enough to be put in the top grade. Some of them may have a slight wound or skinned place that will heal over and not hurt the real worth of the tree. If you are planting an orchard and want your money to go just as far as possible and don't mind staking a few trees, we recommend the "B" Grade trees for your consideration. It is the grade that I nearly always use in my own orchard planting, for experience has shown me that crooks in young trees don't amount to much as they grow out naturally as the tree gets older.

We have been selling "B" trees for many years to customers who have come to the nursery where they could see them in person. They are real "economy" trees. "C" GRADE TREES are too crooked for the "B" grade—often have tops bent over at quite an angle and need staking for a year or two. Some have a short root or a split limb, etc. If you have a piece of hazardous bottom land or a field where you don't want to spend much money for trees, perhaps the C-grades will fill the bill. They usually sell for about half price, and a good percent of them should develop into nice trees.

FAMOUS... Grayway PAPERSHELL PECAN TREES

DIRECT FROM GROWER TO YOU!

• We grow our own papershell pecan trees right in our own fields and there's no middleman when you buy papershell pecan trees at GRAYWAY.

EASY TO LIVE!

• GRAYWAY Papershell Pecan trees are chock-full of stored-up energy. Customers find them easy to live and grow, and our files are full of letters from folks who have expressed amazement at the way these GRAYWAY trees just seem to push their roots down into the soil and start growing.

• One secret of the GRAYWAY is found in the care young trees receive in our nursery. Every tree is given a good start in life, watched and properly cared for. They are grown, dug and handled carefully, and packed to reach the customer in the best possible condition.

• The GRAYWAY plan of supervised care from the baby stage until the trees are ready for shipment and transplanting is one of the many reasons for so many successful GRAYWAY plantings.

• Our famous GRAYWAY brand papershell pecan trees have been planted by the thousands for nearly twenty years over the South and Southwest, and some of the finest producing orchards in this section were planted with GRAYWAY trees.

EARLY TO BEAR!

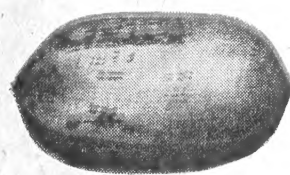

Many customers tell us that their GRAYWAY Papershell Pecan trees begin to bear the second year. Hundreds of trees in our nursery are bearing delicious pecans right in the nursery rows.

Large numbers of GRAYWAY Papershell Pecan Trees shipped to our customers were bearing nuts before they were sold. Visitors have expressed surprise upon seeing tree after tree with big clusters of nuts right in our nursery.

When you set our GRAYWAY Papershell Pecan Trees, you won't have to wait long—because GRAYWAY trees are EARLY TO BEAR.

Count 'em—fifteen fine Papershell Pecans the second summer after planting this GRAYWAY tree. It won't take long for your GRAYWAY trees to begin bearing.

STUART—Old variety, safely used over wider territory than probably any other. Large, medium shell—48-50% kernel. Early ripener.

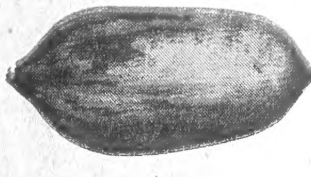

SUCCESS—Most popular eastern variety in Texas. Large—40 per pound; medium shell; 52% kernel. Fairly early producer; ripens uniformly in mid-season. Buds late in spring.

DESIRABLE—One of the largest. Excellent crocker; early bearing; promises to be one of the heaviest producers; thinner shell than Success.

BURKETT—Large—40 per lb. Thin shell; 50% plump, rich kernel. Mid-season ripener; heavy producer. Popular western variety.

WESTERN SCHLEY—Early and heavy producer; about 55 per pound; 60% kernel. Moderately early ripener; vigorous grower; good yard tree.

GIANT MAHAN

Perhaps the largest of all Papershell Pecan varieties. Sometimes 3 inches long; thin shell, vigorous grower and heavy producer. Usually does not fill out very well, and kernel quality not the best, but nuts look like bananas hanging on the tree. (25 cents extra per tree.)

IMPORTANT

1. Add 5c per tree if Scientific Root Treatment is desired.
2. Add 25c per tree for Giant Mahan.
3. Prices are F.O.B. Arlington.
4. Shipment by express or motor freight.
5. The length of root is not included in height of tree.
6. Trees will be pruned, ready for planting, unless you instruct us otherwise.

GUARANTEE:

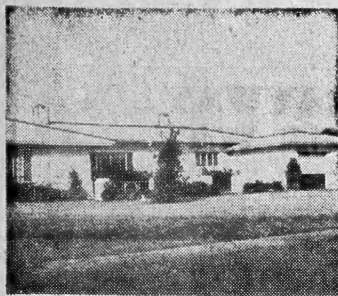

We have been growing and selling nursery stock for more than 20 years, and our thousands of satisfied friends and customers are the result of our way of doing business. We guarantee our GRAYWAY plants and trees to be in first-class, livable condition when they leave the nursery, but we do not guarantee them to grow. We exercise greatest care, but should any plants sold by us prove unable to name, they will be replaced or the purchase money returned upon proof given. It is mutually agreed between us and our customers that we will in no case be liable for more than the original purchase price. We give no other warranty, expressed or implied, unless in writing and signed by O. S. Gray. Our prices are not guaranteed, and are subject to change at any time, without notice.

Improved WALNUTS Delicious old-time flavor

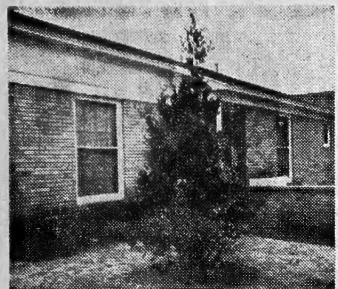

THOMAS Improved Black. Comparatively thin shell. Cracks easily, and meats separate easily in quarters. Delicious old-time flavor. Bears young. Beautiful, long-life tree. Self-fertile. Heavy producer. Valuable for timber and nuts. Good for home shade tree as well as for orchards and for timber.

3 to 4 ft. size \$2.00
4 to 5 ft. size 2.95

HOLLY TREES

A lovely Holly has contributed much to the fine appearance of this nice home. Glossy green leaves and shiny red berries set off a snow-white house.

This beautiful Holly tree seems to have been just what was needed to relieve the sharp angles of two corners and make a more attractive home.

A few trees of East Palatka Holly, full of berries, at our nursery sales yard. Several hundred pounds of soil are held around the roots by a tight wrapping of burlap held in place by heavy woven wire.

THE GLOSSY GREEN FOLIAGE AND BRIGHT RED BERRIES OF HOLLY—MAKE AN EXCELLENT COLOR COMBINATION THAT ADDS A GAY APPEARANCE TO YOUR GARDEN... AND A CHEERY TOUCH TO YOUR HOME!

HOLLIES are among the finest and most admired evergreen trees. They are probably unsurpassed in beauty and popularity. They succeed over a wide range of territory and have been extensively planted in nearly all portions of the United States.

Hollies are attractive at all seasons of the year, but especially so at Christmas when the berries are highly colored and at their best.

ILEX OPACA (American holly) are the native American hollies. Trees sold by nurseries are usually obtained by grafting some selected strain upon ordinary seedling roots, or by rooting portions of the twigs. These special strains are of some plants that have been outstanding in some particular character such as beauty of foliage, hardiness, size of berry, ease of transplanting, etc.

EAST PALATKA is the particular holly pictured here in the various illustrations. It is one of the "American hollies." Foliage is light green, almost smooth and without spines. It is a regular bearer of immense quantities of bright red berries. One of these plants loaded with bright red berries makes a very attractive picture, and East Palatka seems to do well in this particular section as well as through all the South. Our plants are all female or berry-bearing plants.

A WORD ABOUT GROWING HOLLIES

Most of the hollies do not seem difficult to grow. As you know, there are numerous wild hollies in many parts of Texas

and throughout the South. They do best on a somewhat acid soil, and if planted in alkaline soils, it is best to keep the soil conditions acid by the use of peat moss, sulphur or other chemicals somewhat the same as with the common gardenia. To obtain glossy, attractive foliage, it is important to keep good growing conditions.

Among hollies there are both male and female plants. The female plant is the only one that bears berries, and it is possible that few holly berries will be produced without pollination. One species of holly can pollinate the flowers of another species that blooms at the same time. Often it is desirable to have a few male holly plants about the premises. Insects carry the pollen from one plant to another. There is also a way of using a chemical spray to cause berries to set without pollination—we are investigating it.

A WORD ABOUT PRICES

Some of the holly plants illustrated on this page had over 1,000 pounds of soil around the roots and could be handled and transplanted only with machinery. They have sold for from \$65.00 to \$125.00 each transplanted in Dallas and Fort Worth. We furnish an acid soil to be used with each plant. We had a very popular size for \$35.00, delivered and planted. In Chinese and Burfordii, we have a few small plants in 5-inch pots for 75c. In Youpon, we have plants from 45c. on up to \$7.50 for some sheared specimens. We invite you to call or visit us and see our hollies and discuss your needs with us.

ILEX CORNUTA

(Chinese Horned Holly)

A compact-growing Chinese or Oriental holly with very glossy, dark green foliage. The red berries are large and showy. The leaves have long spines at the tip—they give it the name "horned holly." A strikingly beautiful plant either for foundation plantings or for lawn specimens. May also be used as hedge or border. Evergreen. Use male holly of some sort to provide pollen for setting heavy berry crops. On alkaline soils, provide acid condition by using peat moss or chemicals. Ask for prices.

ILEX VOMITORIA

(YOUPON)

A native evergreen holly with small foliage, compact bushy head; produces bright red berries in profusion. Useful and desirable for foundation, border, hedge or specimen planting. We think it is far superior to boxwood in that it gives less trouble. Shears perfectly to any shape or size. Sheared specimens are fine for specimen planting.

We are growing a Youpon Holly called "Pride of Houston" said to be a specially selected kind. We also have a limited number of Dwarf Youpon plants that grow slowly and only to a small size.

Youpons are either male or female plants. The female is the berry-bearing plant. Pollination is probably necessary for heavy berry setting.

Use more Youpon Holly for almost every purpose. It is one of our finest plants.

PRICES: from 45c for small "green thumb size" to \$7.50 for sheared specimens.

ILEX CORNUTA

BURFORDII

This is a sport of I. Burfordii from which it originated. It resembles its parent in general, but its leaves are more rounded and do not have the prominent spines or "horns".

There is some evidence that Burfordii will berry to some extent without the necessity of a male or pollen plant.

The Burfordii holly is very much admired and widely used. Likes acid soil conditions for best results.

Beauty and Color from Grayway's FLOWERING & ORNAMENTAL SHRUBS

(GC means Gallon Can; BR, bare-rooted; B&B, balled and burlapped. Only BR plants can be shipped by us except by special arrangement.)

ALMOND, white flowering. Dwarf deciduous shrub, 3 to 5 ft. In spring, before leaves appear it is mass of delicate, pure white flowers. Hardy. GC \$1.35.

ALMOND, pink flowering. Like white, but flowers dainty pink, double and closely set up and down stem. Never fails to attract attention. GC \$1.35.

BUDLEIA (Summer Lilac or Butterfly Bush). Produces abundance of showy, fragrant flowers throughout summer. Easy to grow. Hardy. DUBONNET. New, brilliant reddish purple. Good for cutting. \$1.35.

CRATE MYRTLE. One of our best known and best loved Southern holly flowering shrubs. It is nearly fool-proof and very popular. Red or white. 75c.

FORSYTHIA. Int. Spectabilis (Golden Bell). Semi-erect growing Golden Bell that when full grown the branches become arching. Abundant deep yellow blossoms in great profusion in early spring. —95c, \$1.25, \$2.45.

HARDY HYDRANGEA (Free Gee). A hardy outdoor shrub with very large cone-shaped flower heads. \$1.35.

LILAC (Persian Outleaf). Blooms on very small plants as early as 8 ft. Long spray of fragrant bright lavender flowers. GC, \$1.25.

SHADE and ORNAMENTAL TREES

● Trees certainly add much to the attractiveness of a home. They provide shade and beauty as well as furnish fruit or nuts in many cases.

● We often say we know of two kinds of places in which properly to plant trees:

1. Where you want them, and
2. Where you need them.

A short time ago we saw a new home built with a large oak tree left growing right up through a large hole left in the roof of the porch. This tree was where the owner wanted it. And a generous number of other fine trees were left where they would provide shade from the house and for the home and for the children's play—where they were needed.

SYCAMORE. Valuable quick-growing tree. Roots resistant to rot. Beautiful, symmetrical form. BR, 4 to 5 ft. 85c. Others \$1.95 to \$15.00.

POPLAR. Tall, upright growth. Valuable for back-grounds. BR, \$1.45, \$1.65.

UMBRELLA CHINA. Quick grower, dense for children or for poultry, dogs, etc. BR, \$2.45.

RED OAK (Spanish Oak or Spotted Oak). One of our most valuable oaks because it thrives under almost any soil condition, even on rocky hillside. Leaves turn beautiful scarlet in fall, making it very attractive and desirable. 5 to 8 ft., \$1.75.

TULIP TREE (Liriodendron tulipifera). Tall, symmetrical shade tree. Dark green leaves. Flower like inverted tulip, greenish yellow, with orange base. BR, 2 to 3 ft., 35c. 3 to 4 ft., \$1.25.

MAGNOLIA Grandiflora. Southern Magnolia. One of the South's finest evergreens. Large, waxy, cream-white flowers often 7 to 8 inches across. Gallon cans, \$1.25.

CORNUS FLORIDA (Flowering Dogwood). A small tree or shrub with very beautiful flowers. Fall foliage brilliantly colored. BR 75c, 95c. B&B specimens up to \$12.50.

ORNAMENTAL VINES

MAGNOLIA (Soulangeana nigrata). A deciduous magnolia in abundance in early spring. Harder than the pink Soulangeana. The breath-taking beauty of this magnolia is difficult to put into words. It's something you'll want to see. Branches from ground up, more like a shrub than a tree. Grows perhaps 15 to 20 feet. BR plants about 3 ft. \$3.75. B&B plants \$6.50.

RED LEAF PLUM. Attractive, showy, red twigs, red leaves, red fruit. 95c, \$1.45, \$2.45.

MIMOSA (Silk Tree). Rapid growing with spreading branches and low flat-topped head. Fine, feathery foliage; profusion of pink flowers in early summer for period of several weeks. Useful and ornamental. Where dense shade is not desired. BR \$1.45, \$1.95 to \$10.00.

FLOWERING CRABAPPLES. Bechtel's double pink is rather dwarf. Makes one of the loveliest sights in our nursery in the spring. Little trees 3 feet high, literally covered with blossoms that I think as lovely as any camellias. They rival the beauty of the famous flowering cherries of Washington. D. C. BR, \$1.45 to \$3.75.

DOLGE. White flowers. Large, attractive, showy red fruit. Good for jelly. You'll like it. BR, \$1.45, \$1.95.

Hopa. Brilliant display pink flowers in spring. Richly colored fruit. Good jelly. BR, \$1.45, \$1.95.

FLOWERING PEACH. Perhaps no tree makes more of a show in the spring than flowering peach. It's a real Prima Dona. And if you have space for it, it's something you'll want to see. Branches from ground up, more like a shrub than a tree. Grows perhaps 15 to 20 feet. BR plants about 3 ft. \$3.75. B&B plants \$6.50.

RED BUD (American). Sometimes called "Judas tree." Early spring bloom before leaves appear. Fast growing. Well known. BR 35c, 95c, \$1.45, \$1.95, \$2.45.

RED BUD (Chinese). Flowers much larger and more showy than American. Dwarf. Makes wonderful display. BR \$1.95, \$5.95.

WISTARIA Tree. One of our most attractive items of wistaria. Long clusters of purple flowers. BR or B&B, \$1.95 to \$7.50.

A neatly kept, well landscaped home always gives a lot of pleasure both to those who live in it as well as to passers by who often pause to ask, "Who lives in that nice home?"

Trees are used for both shade, beauty and fruit or nuts. We know of homes where the paper-shell pecan crops from yard shade trees provide ample nuts for family use and a surplus for sale to pay the taxes. Few plants add so much to a home as trees—no wonder people almost universally love trees.

Shrubs and flowers are used to tie the house to the land, to soften angles, provide screens and give privacy, make hedges, etc., but also to give brilliant displays of color and form for both outdoors and indoors. Perhaps no flower can give the genuine pleasure that comes from those cut from your own bushes.

SCARLET FLOWERING QUINCE

CYDONIA JAPONICA rubra. This newer flowering quince, with its flaming scarlet flowers is usually the first plant to burst into blossom in the spring. We regard as superior in plant and color to the usual flowering quince. A blaze of bloom in early spring, and plants in our field have shown a few blooms from time to time throughout the summer. Fine bushy plants, BR, 35c, 95c, \$1.45, \$1.95. Plants B&B \$1.25 to \$3.50.

ORNAMENTAL VINES

ENGLISH IVY (Hedera Helix). Shiny evergreen leaves. Good ground cover or clings to walls. Will grow in dense shade. 2½ inch pots 35c, \$4.00 doz.; 3 inch pots; 50c, \$5.00 doz.

CLEMATIS paniculata. Hardy climber with profusion of pure white, delicately scented flowers in later summer. 2 year 75c.

CLEMATIS jackmani. Large purple-blue flowers. One of best. 75c.

HALL'S EVERGREEN HONEYSUCKLE. Hardy, evergreen, fragrant white and yellow flowers. 85c each.

GOLDFLAME HONEYSUCKLE. Yellow-gold-pink coloring very showy. A bush honeysuckle that may be sheared. Nearly evergreen. Blooms early spring on into the fall, 2-year, 95c.

WISTARIA. One of the most vigorous of all climbers. Purple, white, or pink. Vines, 95c, \$1.45. Tree forms, \$2.45 to \$7.50.

WOODBINE or Red Trumpet honeysuckle. Showy, red, trumpet shaped flowers in profusion, 95c.

CAROLINA Jessamine (Gelsemium sempervirens). Slender, rapid-growing evergreen. Profusion of yellow flowers in spring. Heavy field grown B&B, \$3.95.

ROSES

2-Year Field Grown

Our rose supply this season is very limited because of the disastrous November freeze, and we are handling mainly only California-grown patented varieties, grown out of the freeze damage areas. Prices not prepaid.

Choose Grayway's EVERGREENS

NOTE: B&B means "balled and burlapped." BR means bare-rooted. One of the best plants for hedges, for foundation planting, under windows, etc. B&B plants, 75c, \$1.95, \$2.45, \$2.95.

BONITA ARBORESCENS. A perfect globe-shaped plant. Well suited for urns, at side of steps, in corners, etc. B&B, \$1.25 up.

SILVER GLOW JUNIPER. Tall-growing, and pyramidal. Shears well. One of our most beautiful plants. Always evokes admiration, and a plant you will enjoy from day to day for years.

to come. Silvery-gray color adds variety to the usual green of shrubbery. These plants are grafted onto other roots.

CANNAERT JUNIPER. Dark green with purple berries. Upright, pyramidal. Hardy everywhere. One of the finest plants we know to use against light-colored buildings. Use it where tall, columnar type of growth desired. Grafted onto other roots. You will enjoy this plant through the years. B&B, \$4.95 to \$12.50.

CHINESE BLUE COLUMN JUNIPER. Slender, pyramidal type. Will grow 20 ft. or more or can be sheared to any height. Foliage of attractive deep blue-gray color. Grafted onto other roots. One of our finest plants of this type. A plant that will give you continued pleasure through the years. B&B, \$2.95 up.

ELEGANS. Gray-green evergreen shrub. Hardy, attractive. B&B.

PROTIA serrulata. Highly attractive, holly-like leaves. Evergreen. Colorful and useful. B&B, \$1.25 up.

MAMONIA aquatilis (Oregon grape). Medium size evergreen shrub for sun or shade. Glossy green holly-like foliage. Clusters of white flowers followed by bluish-black berries. B&B.

LAUREL VERA (English lavender). Dwarf, compact, silvery gray foliage. For sunny places. B&B, \$1.25, \$1.45.

NANDINA domestica. Erect growing. Brilliant green to red foliage. Brilliant red berries during fall and winter. B&B, 75c to \$3.95.

Euonymus

Patens

This evergreen plant is particularly lovely in the fall and winter with its myriads of coral-red berries that dangle like lanterns in the breeze. Does well in sun or shade. Shears readily into almost any shape or height. Makes good single or mass plantings, and makes good hedge. Will cling to brick or stucco wall or chimney, and good for planting in narrow areas where many other shrubs grow out of bounds. It seems to stand more cold and freezing weather than the other bushy evergreens. Transplants easily. BR or B&B, 95c to \$2.95.

ITALIAN JASMINE. Seems to stand almost anything—easy to grow. Slender, drooping branches, green foliage, profusion of yellow flowers early spring to late fall. May be sheared. B&B, \$1.47, \$1.75.

GARDENIA Fortunei. The very popular "everblooming" gardenia. Dense bush, glossy, dark green leaves, fragrant waxy white flowers. B&B, 95c to \$1.75, \$3.50.

CENIZO (Leucophyllum texanum). Called "Purple Sage." Low dense shrub, grayish-green leaves. Profusion of small purple flowers after rains. Lovely. Good specimen or in mass. B&B, \$2.95.

WAXLEAF Ligustrum. Glossy green, evergreen foliage. Very useful and valuable for landscaping. 35c to \$3.95.

EUONYMUS JAPONICA. Very upright. Glossy green leaves. Some red berries in fall. Valuable for specimen or hedge planting. BR, 35c to \$2.45.

SILVER PFITZER JUNIPER. Similar to the usual green foliage Pfitzer, except its silvery-gray color adds variety to the usual greenery. An unusual and a most attractive plant. B&B \$1.25 to \$3.95.

CHERRY LAUREL. Beautiful glossy green leaves. Shears perfectly. As specimen plants or in hedges. Pyramidal forms are being used to replace the common arborescens. B&B, \$2.50 to \$8.50.

PYRACANTHA (Firethorn) RED BERRY. Upright form. Evergreen. Attractive red berries in winter. Gal. cans, \$1.95, 3-gal. cans, \$3.95.

PYRACANTHA Lalandi, ORANGE BERRY. Upright form. Orange-red berries. More hardy than red; same price.

ITALIAN CYPRUS. The familiar, slender, tall-growing plant used in front of columns, chimneys, etc. B&B, \$1.95 to \$8.95.

BLUE-SPICE ARBORESCENS. Similar to Baker's, but foliage with slight bluish cast, more graceful. You'll like it. B&B, 95c to \$3.95.

CHERRY LAUREL. Beautiful glossy green leaves. Shears perfectly. As specimen plants or in hedges. Pyramidal forms are being used to replace the common arborescens. B&B, \$2.50 to \$8.50.

PYRACANTHA Lalandi, ORANGE BERRY. Upright form. Orange-red berries. More hardy than red; same price.

ITALIAN CYPRUS. The familiar, slender, tall-growing plant used in front of columns, chimneys, etc. B&B, \$1.95 to \$8.95.

BLUE-SPICE ARBORESCENS. Similar to Baker's, but foliage with slight bluish cast, more graceful. You'll like it. B&B, 95c to \$3.95.

CHERRY LAUREL. Beautiful glossy green leaves. Shears perfectly. As specimen plants or in hedges. Pyramidal forms are being used to replace the common arborescens. B&B, \$2.50 to \$8.50.

PYRACANTHA Lalandi, ORANGE BERRY. Upright form. Orange-red berries. More hardy than red; same price.

ITALIAN CYPRUS. The familiar, slender, tall-growing plant used in front of columns, chimneys, etc. B&B, \$1.95 to \$8.95.

BLUE-SPICE ARBORESCENS. Similar to Baker's, but foliage with slight bluish cast, more graceful. You'll like it. B&B, 95c to \$3.95.
